GRAPE VARIETY	100% Cabernet Sauvignon
GROWING REGION	Frankland River, Great Southern
TECHNICAL DETAILS	Alc 12% pH 3.30 TA 5.6g/L RS 2.2g/L
VINTAGE	Vintage 2020 will be remembered as the earliest harvest on record with great fruit quality. The growing season started warm and very dry. Spring rainfall was also below average and our soils were quite dry as the vines came out of dormancy and watering commenced earlier than normal. These dry conditions kept disease pressure low which was a positive, but also led to lower vine vigour compared to other years. The favourable weather for the remainder of the ripening period meant we had an “early” vintage. Our whites retained great natural acidity and minerality whilst the colour of the reds were amazing.
APPEARANCE	Pale pink.
NOSE	Lively aromas of pomegranate and vibrant forest fruits.
PALATE	This refreshingly dry Cabernet Sauvignon Rosé has lively red apple acidity with generous raspberry and red berry fruits. A satisfying style rosé for any occasion.
VINIFICATION	Harvested in the early morning, destemmed and pressed immediately with very little skin contact. This rosé is then racked before controlled fermentation commences. The rosé is then blended and bottled within 3 months to preserve the freshness and acidity.
CELLARING	Drink now while fresh flavours dominate.
WINEMAKERS COMMENTS	This style is all about regionality, freshness and vitality.
SERVE	Serve slightly chilled at 8-12°C
FOOD	Crispy skinned salmon and salad with a fresh citrus dressing.
